DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-6, 8, 10, and 12-14 (renumbered 1-10) are allowed. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Pollack (WO 01/36220). As best depicted in Figure 3A, Pollack is directed to a pneumatic tire construction in which a transponder module 200 is sandwiched between sheet-shaped members 302, 304. The reference further teaches that the edges of the sheet-shaped members are sealed (Page 28, Lines 27+). In describing the sheet-shaped members, Pollack suggests the use of rubber sheets. While the assembly of Pollack might have some degree of "slidability", the reference fails to expressly desire such an arrangement and thus, one of ordinary skill in the art at the time of the invention would not have been motivated to (a) coat the inner surface of the sheet-shaped members with a material to promotes sliding or (b) form the sheet-shaped members from a fluorine resin. It is emphasized that Pollack lacks any suggestion or teaching in regards to forming the assembly with a degree of "slidability" and thus, the particular materials defined by the claimed invention would not have been obvious to one of ordinary skill in the art at the time of the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
